DPM Systems Technologies Ltd.

Recoil Reduction System

INSTALLATION INSTRUCTIONS FOR GLOCK 19-19X-23-32-45-47

SAFETY NOTES

Our products do not override existing guidelines concerning the safe and proper use of your pistol.

1. Use the DPM Recoil Reduction System **only** with the pistol model specified on the packaging label.

DO NOT USE the system with other pistol models or versions, as this may cause damage to the recoil system and possibly to the pistol itself.

2. Always use one of the included springs (typically, the longer spring is the heavier one). If additional parts such as spring plugs, washers, or spacers are included, please read the accompanying or included specific instructions.

3. DO NOT USE THIS PRODUCT ON MODIFIED PISTOLS.

If your pistol has been internally modified, please contact us for further information or a customized solution.

ATTENTION: DPM Systems Technologies Ltd. and its distributors are not responsible for any damage or injury that may result from incorrect installation or use of its products.

1) Push the Recoil Rod forward (Fig. 1) to fit in the correct position on the pistol's barrel (Fig. 2).

2) Ensure that the DPM system is properly installed. Reassemble the slide onto the frame, and rack the slide several times to confirm that the DPM recoil system functions without restriction.

POUND RATINGS

Slide in battery (idle position): 10 lbs

Slide at full open position: 24 lbs

Visit the product's page to watch video instructions.
