

DPM RECOIL SYSTEM-SIG SAUER P320 COMPACT VERSION 1 & 2 - INSTALLATION INSTRUCTIONS

The DPM Recoil Reduction System includes the Recoil rod, one spring plug and three different in length External Springs. (Fig. 1)

Fig. 1

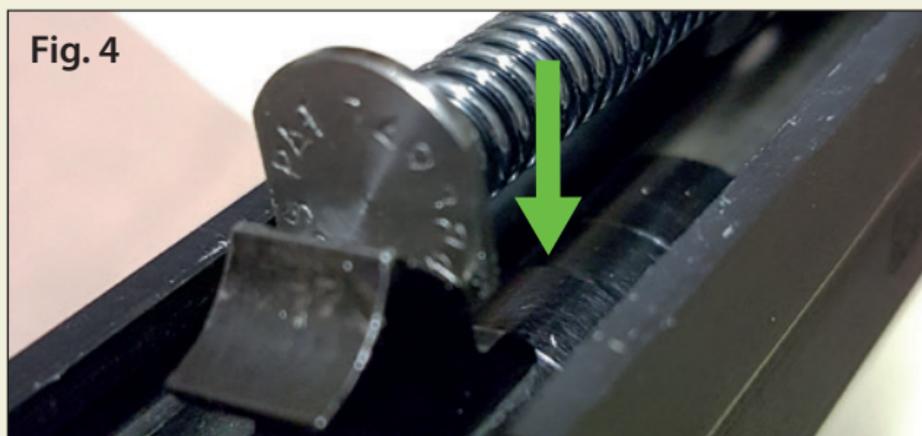

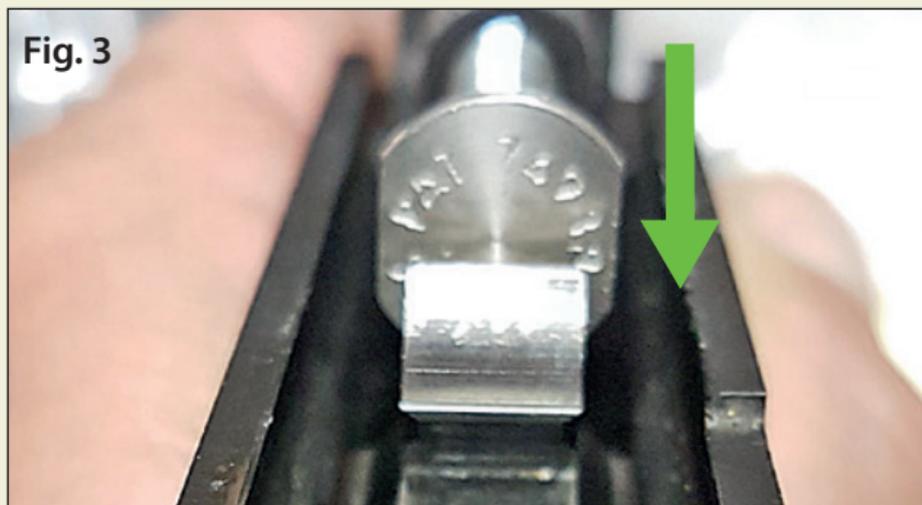

Fig. 2

1. **ATTENTION:**

The base of the DPM Recoil Rod is “egg-shaped”, the same shape like Sig Sauer P320 Compact Version 2, but also can be used in Version 1 where the base shape of the standard recoil rod is round (Fig. 2)

2. **ATTENTION:** Always install the recoil rod base vertically to the barrel correct position. If you place the rod base horizontally, the pistol can't function (Fig. 3, 4)

3. Ensure that the DPM system is placed in the correct way, reassemble the slide on the frame and rack the slide several times to ensure that the DPM Recoil system functions unrestricted.
